

- 3
- (b) a circuit coupled to the microprocessor for detecting the incoming police radar signal; and
 - (c) a global positioning system receiver coupled to the microprocessor and operable to provide the microprocessor with data.

Remarks

The Examiner has rejected claims 1-21 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which application regard the invention. More specifically, the Examiner pointed out that uses of the following lack antecedent basis: "the position;" "the device;" "the frequency;" "the signal strength;" and "the velocity."

The Examiner also rejected claim 18 because the uses of the word "coupled" was indefinite and unclear.

The Examiner stated that claims 2-10, 12-17, and 19-21 are unclear in that they depend from unclear independent claims 1 and 11.

Applicant has amended independent claims 1 and 11 to provide proper antecedent basis for "the position," "the device," "the frequency," "the signal strength," and "the velocity."

Applicant has amended claim 18 to by adding an additional limitation that clarifies the meaning of coupling of the global positioning receiver and the microprocessor. Claim 18 now requires the global positioning system be "operable to provide the microprocessor with data." Support for the additional limitation can be found on lines 22 and 23, page 5 of the Specification. ("Thus, the GPS receiver can provide the microprocessor with data that indicates the position, the velocity, and/or the heading of the radar detector.")

Applicant has also amended claims 12 through 15 by replacing "position" with "velocity." The word "position" was erroneously included in these claims.

Conclusion

In light of the above amendments and remarks, applicant earnestly seeks reconsideration of the rejected claims. It is submitted that the application is in a condition for allowance. Such allowance at an early date is respectfully requested.

The above amendments and remarks are believed to be a complete response to the outstanding Examiner's Action. Should any issues remain which would preclude the prompt disposition of this case, it is requested that the Examiner contact the Applicant by telephone at 208-898-4790.

Respectfully submitted,
